OUR SPA

This outstanding space measuring 2200 square metres is subtly decorated in wood and stone. It offers you the opportunity of recharging your batteries far from the turmoil of everyday, while enjoying a magnificent panoramic view.

The Spa des Bisses draws its inspiration from our region, with its wealth of natural resources: our manmade channels or bisses, water and wood, stone and the forest. The herbs and wild flowers of our mountains are the principal ingredients behind the range of therapies offered by this outstanding wellness suite.

The products used by our beauty and relaxation treatments are certified as being of biological origin and locally sourced. They will seduce your senses with their texture and their gently aromatic emanations. They offer massages, wraps, peelings, facial care and more. The expert hands of our therapists have the skills that will restore and rejuvenate you.
